

MUS 120 Performance Evaluation Procedures

These apply to all four performance evaluations

Each student will get to choose one or two songs to play from a short list. There will also be an assigned scale (or scales) and/or other similar exercises relating to technique.

Details for each of the four performance evaluations will be on the syllabus in that week's section.

Songs will primarily come out of the syllabus, or links will be provided for additional scores. Scales/exercises will be available through links on the syllabus as well. All selections will have a linked-to audio rendition. There will usually be an extra credit option.

Most performances will be in a one-to-one setting, but some may take place in a group setting.

Duets may be assigned (optionally, or for extra credit) towards the end of the semester.

Students will have up to three attempts for each song and exercise.
