

MUS 231
EXTRA CREDIT ASSIGNMENT

With Lassus' *Oculus non Vidit*, perform the following tasks:

- Rewrite the first 15 measures, including the text, so it is in common time (four-four) by halving all the note values—so it will still be 15 measures long
- Perform an interval analysis, putting your intervals above the score (to keep them from colliding with the text)
- Using horizontal brackets, mark all instances of canonic imitation, citing the momentary rule for each instance (be careful, because the imitation changes more often than you think)
- Using rectangular boxes, mark all species counterpoint relationships (1st through 5th) you can identify
- It must be beautifully hand-written in pencil on otherwise unmarked, 8 ½ X 11" (approx.) staff paper – significantly smaller paper or half-sheets of paper will not be accepted
- **Leave a blank staff system between systems to aid in the clarity of your analysis**
