

Music 233 Collaborative Assignment Guidelines

Because collaborative efforts enhance the learning process from some, students have the option of working on certain assignments in pairs (i.e. two students). Students can choose to do this for any or all of the assignments listed below. Students can work with the same partners or not each time.

Students choosing this option must complete the assignment as specified and simply put both names on the (one) paper. Each student in the pair will receive the same grade. Both students will also receive the same redo grade if an assignment is redone.

The following assignments may be done collaboratively (in pairs):
